

Sebastian Loyacono

 Cybersecurity Bootcamp

 October, 2024 – June, 2025

 Issue date: 21 May, 2025

Overview

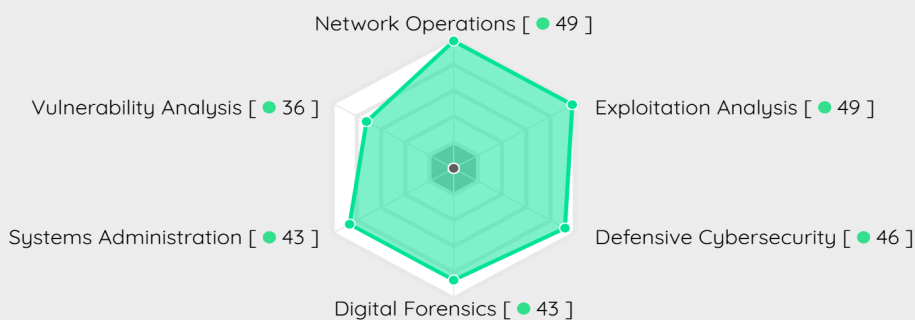

Program Introduction

In this cybersecurity program, students tackle real-world cybersecurity challenges and engage in hands-on practices, applying critical thinking and technical skills. This approach enhances their practical expertise and prepares them for real-world cybersecurity scenarios, bridging the gap between theory and practice.

Skills

Work Roles

 Practice Labs

• The work roles above are aligned with the NIST/NICE framework.

Tools

Hands-on practice

Number of practice labs which includes popular tools/technologies that were completed:
